Jitesh Pandey

MERN Stack Developer

mr.jiteshpandey9170@gmail.com | 9170006101 | LinkedIn | GitHub | LeetCode

Profile

MERN Stack Developer with **3+ years** of experience building scalable, real-time web applications using **React.js, Node.js, Express.js, and MongoDB**. Strong background in REST API design, JWT-based authentication, real-time systems (**Socket.IO, WebRTC**), and **system design** with production deployment experience on **AWS EC2** and Linux servers. Skilled in **TypeScript, PostgreSQL, Apache Kafka, background worker/queue systems, and GenAI application development (RAG pipelines, LLM API integration)**, bringing a well-rounded, modern full-stack skill set.

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, Core Java
- **Frontend:** React.js, HTML, CSS, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, FastAPIS
- **Databases:** MongoDB, Mongoose, PostgreSQL, Redis, Firebase
- **Messaging / Async Processing:** Apache Kafka, Background Workers, Job Queues
- **System Design:** Scalable architecture, Microservices, Load Balancing, Caching Strategies
- **Cloud / DevOps:** AWS (EC2), Linux Server, Docker
- **Payment Integration:** Razorpay, Cashfree, Paytm Payment Gateway
- **AI / GenAI:** LLM API integration, RAG (Retrieval-Augmented Generation), Prompt Engineering, GitHub Copilot, ChatGPT/Claude for dev workflows
- **Tools:** Git, GitHub, Postman, Axios
- **Core:** DSA, REST APIs, Socket.IO, WebRTC, Microservices

Experience

Knobee Social India Pvt Ltd *Feb 2024 – Present*

MERN Stack Developer

- Built and optimized **REST APIs** using **Node.js** and **Express.js** as part of the core **MERN stack**
- Implemented **JWT authentication** and role-based access control for secure user management
- Managed **microservices** on **Linux servers** for scalable, production-grade systems
- Integrated real-time features using **Socket.IO** for live user interactions
- Optimized **MongoDB** queries and API performance to improve application speed

Harshly Education and Skills Technology Pvt Ltd *Jan 2023 – Jan 2024*

MERN Developer

- Built responsive UI using **React.js** and **Tailwind CSS** as part of the **MERN stack**
- Developed **REST APIs** with **Node.js**, **MongoDB** and **Mongoose** for backend data handling
- Improved application performance and responsiveness across the full stack

Projects

KarKiosk Live

- Built a **MERN stack** (**React.js, Node.js, Express.js, MongoDB**) car marketplace with dynamic filtering and search functionality
- Designed **REST APIs** with **MongoDB** indexing and query optimization to reduce API response time and improve overall application speed
- Integrated **Paytm Payment Gateway** for secure, seamless checkout and transaction processing
- Implemented **Redis** caching for frequently accessed listings, easing database load and delivering a faster, smoother user experience

EasyHaiOnline Live

- Built and deployed a full-stack **MERN stack** e-commerce platform, with backend hosted on **AWS EC2** running **Linux servers** for a production-grade, scalable setup
- Optimized backend **API** performance through efficient **MongoDB** schema design and query indexing, reducing API response time
- Integrated **Razorpay Payment Gateway** for secure, seamless checkout and transaction processing
- Implemented reliable deployment and process management practices to ensure stable performance under traffic load

Knobee Live

- Built a social media application on **MERN stack** (**React.js, Node.js, Express.js, MongoDB**) with a **microservices** backend, **deployed and managed on Linux servers** for independent, scalable service deployment
- Integrated **Socket.IO** for real-time features (feed updates, notifications), delivering low-latency live interactions
- Optimized backend microservices to reduce **API** response time and improve system throughput as user base grew

BeeGoss Web | App

- Built a real-time group audio platform using **Node.js, Socket.IO, WebRTC**, and **Firebase**
- Architected and **deployed a Linux-based microservice backend** to handle real-time communication at scale, minimizing latency and connection drops
- Integrated **Cashfree Payment Gateway** for secure in-app payments and transaction processing
- Optimized backend service handling and **API** performance, delivering a stable, user-friendly real-time experience

Education

B.Tech, Computer Science & Engineering

Dr. APJ Abdul Kalam Technical University **CGPA: 7.6/10 (Distinction)**
